

Senior UI/UX Designer

We are looking for new colleagues in Prague

IPS - a Swiss SW company with the development centres in the Czech Republic and Vietnam - is looking for motivated and skilled colleague to expand our team.

What will you do

Participate in development of unique high-tech solutions in areas such as IoT, Cloud, Advanced Analytics / BI, Augmented Reality, Advanced Visualization or Mobile/Web Solutions.

- Competence Centre for UI/UX for our customers
- Guide our UI/UX strategy for delivering compelling design experience on web and mobile platforms
- Design beautiful UIs, create wireframes and prototypes before delivering the final visuals
- Actively communicate business needs with stakeholders and translate into innovative user experience
- Support pre-sales, requirement engineering and development teams with UI/UX know-how
- Cooperate on UI implementation across the projects
- Proactively propose improvements in the design, ergonomics, and user flows of our solutions to keep up to date with latest trends
- Drive user and usability testing

Your skills and experience

- 5+ years in user experience
- Fluent in Interaction Design, utilizing UI/UX best practices and latest design trends
- Excellent knowledge of design thinking, wireframing and prototyping (e.g. Adobe XD, Balsamiq, Figma, etc.)
- Working knowledge of UI design across platforms, browsers, and devices
- Excellent communication and presentation skills in English
- Proactive attitude, team spirit and good problem-solving skills
- Experience with web technologies (HTML5, JavaScript/Typescript/ES6, CSS3/Sass)
- Experience with modern web frameworks (Angular/React, Bootstrap, Material Design) is advantage
- Experience with WebGL or 3D/AR web frameworks (Three.js, etc.) is advantage
